(a) Verbal Report from Manager of Operations - Re: Goose Lake Park - Access being Considered from Stepping Stones Municipally owned Right of Way (CC provision 90(1)(k))

The Manager of Operations outlined the work that the Regional District North Okanagan (RDNO) is undertaking in the creation of a naturalized park around the Goose Lake area.

Discussion

- There is still quite a bit of work to be completed in the planning stages.
- The Township and RDNO will need to enter into a maintenance agreement to address issues such as maintenance of the gate, garbage, etc.
- The Township, as part of the referral process could ask the RDNO to install cameras along the access road to ensure those are in place should they be needed .
- Water operators for the RDNO currently use the right-of-way for access.
- Things to consider for comments are speed limit signage, speed bumps, dust control in the area as this will increase traffic for nearby residents and will have to be contemplated in the access request.
- Staff are currently concerned about the size of the proposed parking lot as it is quite small for the potential volume of vehicles that will be accessing the trails and that will pose problems with people parking in unauthorized areas.
