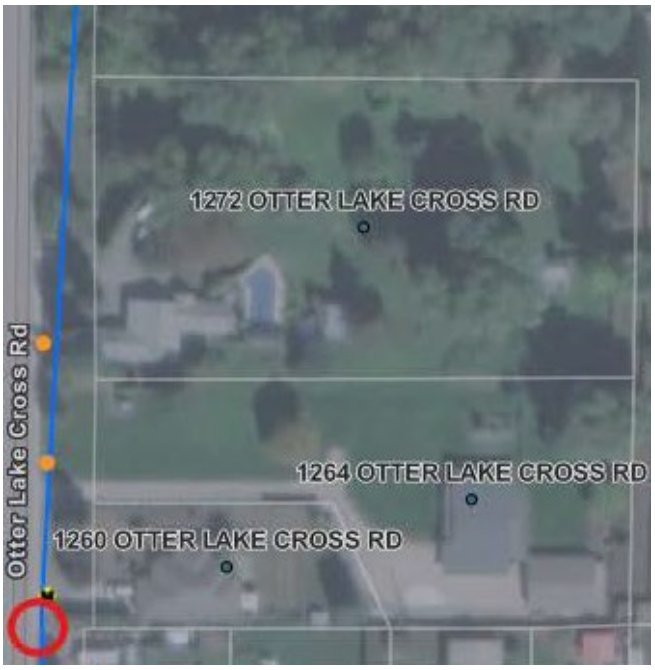
FOR IMMEDIATE RELEASE

South Local Area Service
Water Shut Off & Boil Water Advisory
Friday, June 12, 2026

[Spallumcheen, BC, June 12, 2026] – Due to a watermain leak within the Larkin Water Area of the South Local Area Service, the Township of Spallumcheen wishes to advise the following residents that repair work will be taking place on Friday, June 12, 2026 and will require a temporary disruption to water service to facilitate these repairs. The water disruption will impact the following properties:

1260 Otter Lake Cross Rd | 1264 Otter Lake Cross Rd | 1272 Otter Lake Cross Rd

During this period, water service to your residence will be temporarily turned off. To minimize the inconvenience, we recommend that you take the following precautions:



- Store an adequate supply of water for drinking, cooking, household needs and sanitation purposes.
- Ensure that faucets are turned off to prevent any damage once water service is restored.
- Plan ahead for any activities that may require water, such as bathing or laundry.

During the water interruption, you may notice reduced water pressure, air in the water, discoloration and/or increased turbidity (cloudiness). Residents can run a **cold** water tap until the water has cleared. An outside tap is generally recommended. Normally, it only takes a few minutes to clear the lines but may require longer.

At the advice of Interior Health, if there is a temporary water shut off then a **Boil Water Advisory will be in effect** upon water service resuming until testing confirms water quality levels in the area.

If placed on a boil water advisory, residents and businesses should follow the Centre for Disease Control (CDC) recommendations. If possible, use alternate water sources such as bottled water during this time or bring tap water to a full rolling boil for 1 minute before use. Additional links and resources regarding a boil water advisory can be found on the Township of Spallumcheen website www.spallumcheentwp.bc.ca
