

Planned Water Outage

Round Prairie Local Area Service
February 29, 2024
8:30 am to 2:00 pm

Residents connected to the **Round Prairie Local Area Service** are advised of a planned water outage scheduled on Thursday, **February 29, 2024** between the hours of **8:30 am to 2:00 pm**. The interruption is for infrastructure improvements to the system.

Residents are advised to:

- shut off hot and cold faucets and any equipment that requires water,
- store sufficient drinking water for the anticipated period of interruption,
- isolate the supply to your hot water tank,
- fill a bathtub or other large container with water to use for toilet flushing.

After completion of the infrastructure improvements, the system will be flushed which may cause visual changes to your water such as discolouration which generally lasts no more than 30 minutes with regular household usage. Please note this is an aesthetic change only and the water remains safe to use.

Thank you for your cooperation.

Please contact the Township of Spallumcheen at (250) 546-3013 if you have any questions.
